

## File Import Instructions - PCLogBook v4.0 to DiveLogBook

These instructions are for current TUSA PC Logbook users who would like to transfer their current log file(s) to the updated TUSA DiveLogBook software.

Once TUSA DiveLogbBook software has been installed on the PC, please follow the steps below to import the existing/old log files. Repeat as necessary if multiple logbook files exist in PC Logbook.

To download the updated DiveLogBook software, <u>click here</u>.

- 1. Open PCLogBook program.
- 2. To locate the existing logbook file (.lgb), select File, and Import

Vew	Ctrl+N	Site	Date	Entry	Dive Time(min)	Max.Depth(ft)	Total DiveT.	Product
pen	Ctrl+O	Geat Barrire Reef	09/03/2002	08:57	- 31	60	0:31	IQ-800
ave	Ctrl+5	Blue Hole	10/12/2002	12:58	44	53	1:15	IQ-800
ave As		Blue Hole	08/19/2003	13:25	392	18	7:47	IQ-700
		Blue Hole	01/09/2004	10:55	64	67	8:51	IQ-700
Print	Ctrl+P	Babeldaob	07/21/2004	15:43	19	19	9:10	IQ-700
Preview	7.06294901							
Printer Set up	)							
Import	Ctl+I							
Export	Ctrl+E							
Close								

3. Once import is selected, the program will open the directory where the .lgb file is located on the computer.

- 7. Locate the logbook file desired for import, select and click open.
- 8. The import process will begin and may take several minutes dependent upon size of file.

You have now successfully transferred your logbook data from TUSA PCLogBook to the TUSA DiveLogBook software.

For further information, please visit the Help section in the software.
